

Voice Calculator Tutorial

Voice Calculator Tutorial

Difficulty: intermediate

Lesson Type: tutorial

Subject: computer science

Grade Level:

- 6-8
- 9-12

Resource URL: [Voice Calculator Tutorial](#)

Have you ever wondered how conversational AI agents such as Alexa and Siri work? How do they interpret what you are saying to them and grasp your intent? How do they then know how to appropriately and meaningfully respond to you? In this project you are challenged to create your very first own Voice User Interface (VUI) as you build a voice-driven calculator that can do basic arithmetic operations.
